# Zero-Knowledge Interactive Proof

Alice

Bob

イロト イポト イヨト イヨト

- interactive method for one party to prove to another that a statement S is true, without revealing anything other than the veracity of S.
- **O Completeness:** if S is true, the honest verifier will be convinced of this fact
- Soundness: if S is false, no cheating prover can convince the honest verifier that it is true
- **Zero-knowledge:** if S is true, no cheating verifier learns anything other than this fact.

# Zero-Knowledge Interactive Proof

A user can ask for the certification of pk, but if he knows the associated sk only:

With a Smooth Projective Hash Function

 $\mathcal{L}$ : **pk** and C = C(sk; r) are associated to the same sk

- U sends his pk, and an encryption C of sk;
- A generates the certificate Cert for pk, and sends it, masked by Hash = Hash(hk; (pk, C));
- U computes Hash = ProjHash(hp; (pk, C), r)), and gets Cert.

Implicit proof of knowledge of sk

Definition	[CS02,GL03]
<ul> <li>Let {H} be a family of functions:</li> <li>X, domain of these functions</li> </ul>	
<ul> <li>L, subset (a language) of this domain</li> </ul>	
such that, for any point x in L, $H(x)$ can be computed by using	
• either a <i>secret</i> hashing key hk: $H(x) = \text{Hash}_L(\text{hk}; x)$ ;	
• or a <i>public</i> projected key hp: $H'(x) = \operatorname{ProjHash}_{L}(\operatorname{hp}; x, w)$	

Public mapping  $hk \mapsto hp = ProjKG_L(hk, x)$ 

Image: A math a math

[CS02]

For any  $x \in X$ ,  $H(x) = \text{Hash}_{L}(hk; x)$ For any  $x \in L$ ,  $H(x) = \text{ProjHash}_{L}(hp; x, w)$ w witness that  $x \in L$ ,  $hp = \text{ProjKG}_{L}(hk, x)$ 

#### Smoothness

For any  $x \notin L$ , H(x) and hp are independent

# Pseudo-Randomness

For any  $x \in L$ , H(x) is pseudo-random, without a witness w

The latter property requires *L* to be a hard-partitioned subset of *X*.

イロト イヨト イヨト

For any  $x \in X$ ,  $H(x) = \text{Hash}_L(hk; x)$ For any  $x \in L$ ,  $H(x) = \text{ProjHash}_L(hp; x, w)$ w witness that  $x \in L$ ,  $hp = \text{ProjKG}_L(hk, x)$ 

#### Smoothness
